

Hello to Friends of Farming,
after many tractor trailers I wanted to make these for my fans and not only. The style is one of my latest mod, with weight and size (scale 1:1). The project was realized thanks to the manufacturer (Randazzo Brothers) that in addition to the maximum collaboration has also provided the CAD model that I had to remodel due to excessive polygons; thanks to JD7530 for counseling and manipulation of CAD files. This mod, despite the high number of polygons, it reveals very slight ingame confirming the quality of the work done.

The load capacity is 37.400L and the length of the body is of 6m.

Credits :Ago-modding - Scripts: Sven777b ,Manuel Leithner, fruktor, FireAndIce.

Happy game!

Ago Modding.
